PLATFORM HOME ELEVATOR

- ❧ Drive Method : Traction Drive
- ❧ Minimum Pit Depth : 0 mm
- ❧ Speed : 0.2 m/s - 0.3 m/s
- ❧ Voltage : 220V
- ❧ Minimum Top Height : 2300mm
- ❧ The Platform Lift is a kind of Traction Elevator, it doesn't have the cabin wall, which make it be closer to the shaft wall. So it's more suitable for the limited size of installation area. It has a Fashionable and Beautiful Decoration, like the Lighting Cabin and Lighting Shaft. The Requirements for Civil Construction are Low, but the Requirements for installation are High.
